

Manual barrel sauna

The barrel sauna (or barrel sauna) is a round outdoor sauna, which resembles a barrel due to its shape and the metal tension straps. The barrel sauna is becoming increasingly popular, partly due to its appearance, but the shape also has other advantages. Think of a faster heating time and better circulation of heat due to the round shape.

The barrel sauna is equipped with lighting under the benches. The controls can be found on the inside above the ventilation slide.

Please keep a warm-up time in mind of 60 to 90 minutes on average. This time depends on the outside temperature.

The barrel sauna can be used all year round. Please open the ventilation slide and close the door after use. Ashes can be left in the ash bucket.

Some rules:

- do not wear clothes in the sauna
- take a shower before and after use
- always use a towel to sit and stand on
- do not leave children in the sauna without adult supervision
- the sauna is not a playground (do not enter with shoes)

Enjoy it !

Use chairs, tables and BBQ

Please store the chairs in this storage room after use and stack them in groups of 4 (see photo). Please place the tables under the canopy. Remember to clean the BBQ grill and leave the ashes in the ash bucket!
